College of Art)

As a graphic and instructional designer with Performance Frontiers, Jason breathes life into complex theory and unlocks new ways of thinking through the production of captivating tools and designs.

Jason applies his expertise as a ground-breaking artist, designer and educator to the development of cutting-edge print resources and online learning tools. His career portfolio spans the fine-arts, design and arts education sectors. He has taught internationally and lectured in university settings, and has also worked in freelance, agency and in-house design contexts in the travel and health sectors. He understands the mechanics of learning and takes an active role in designing our engaging learning experiences by developing innovative, meaningful and interactive tools, resources and visual stimuli.

Jason never stops moving, creating, thinking and reflecting. He believes that smart design is essential to sustainable business practice, and his enviable design acumen helps us remain at the forefront of visual and interactive technologies.
